

# Institute of Computer Engineering Technology (ICET) - Sri Lanka

## Overview of ICET Programs

The Institute of Computer Engineering Technology (ICET) in Sri Lanka offers various programs to train individuals in the field of software engineering and technology. Two of their most prominent courses are the iCET Certified Master (iCM) program and the iCET Certified Developer (iCD) program.

### 1. **\*\*iCM Program\*\***

- Duration: 6 Months
- Target Audience: School students, university students, or anyone interested in programming.
  - Focus: Programming Fundamentals, Object-Oriented Programming, and Enterprise-Level Application Development.
- Key Outcome: Participants will gain the ability to independently develop applications including web, mobile, and desktop software.

### 2. **\*\*iCD Program\*\***

- Duration: 14 Months
- Target Audience: IT graduates, non-IT graduates, and professionals.
  - Focus: Full software development lifecycle, including project execution and industry-level training.
- Key Outcome: Equips participants with both technical and soft skills, making them highly employable in the software industry.
